# SERVICES OFFERINGS

## APPLICATION DEVELOPMENT

- Successfully completed and delivered many innovative application development projects globally by adopting flexible and scalable architectures that ensure 24x7 Business availability and reduced development cycle times.

## APPLICATION MANAGEMENT

- BCS's Application Management service provides its clients high value and quality support and maintenance services by operating on a continually improving service model based on advanced processes.

# SERVICES OFFERINGS

## USER INTERFACE ENHANCEMENTS

- Improving or Enhancing the Interface entails moving the core application as is, and building wrapper systems around it. This is useful when one is interested in Considering some technology up gradation, while not disturbing the basic environmental framework.

## LEGACY MIGRATION

- BCS's migration team understands how critical it is to adopt new technology and keep current applications in place. Legacy Migration is an opportunity to align business processes more closely with new IT capabilities.

# SOFTWARE DEVELOPMENT

## REQUIREMENT GATHERING

- This is the first phase for every project when our business consultants meets the client to understand the course, design and platform requirements

## ANALYSIS & DESIGN

- Specialists from project management, software engineering and graphics design analyzes the client's requirements, design the software architecture and their implications on product development

# SOFTWARE DEVELOPMENT

## DEVELOPMENT & TESTING

- First the prototype created and approved, functionally gets completed and is staged in the development platform for client review. Testing is done at every phase by a dedicated testing partner

## DEPLOYMENT & TRAINING

- Once the system is in the production, end user and power user trainings are provided and are continuously monitored for a period of time for any help required.
